

# Jorge Antonio Paniagua Ramos

Frontend Developer | React · TypeScript · Next.js

Puebla, Mexico · (+52) 222 920 0704 · [Jorge Antonio Paniagua Ramos](#) · [LinkedIn](#) · [GitHub](#) · [Portafolio](#)

## SUMMARY

---

Frontend Developer with 5+ years of experience building scalable and maintainable web applications using React, TypeScript, and Next.js. Experienced in designing frontend architectures, reusable component systems, data-driven interfaces, GraphQL integrations, state management, and complex business workflows.

## TECHNICAL SKILLS

---

**Frontend:** React, Next.js, TypeScript, JavaScript, HTML5, CSS, Tailwind CSS, Vite

**State & Data:** Redux Toolkit, Zustand, React Query, Apollo Client, GraphQL, REST APIs

**Forms & UI:** React Hook Form, Zod, Storybook, Radix UI, Material UI

**Backend:** Node.js, NestJS, Express.js

**Databases:** MongoDB, Firebase, SQL Server

**Other:** Three.js, React Three Fiber

## PROFESSIONAL EXPERIENCE

---

**Didacteca** — *Frontend Developer*

**Jun 2026 - Aug 2026** · *Puebla, Mexico*

- Developed and maintained a business application for inventory and distribution platform using **React, TypeScript, Next.js, GraphQL, Apollo Client, and Tailwind CSS**.
- Designed reusable frontend architectures using **custom hooks, shared components, React Hook Form, Zod, and state management**.
- Built complex data-driven interfaces for inventory, sales, orders, stock movements, and internal transfers, including advanced filtering, pagination, forms, and dynamic tables.
- Optimized GraphQL data fetching and client-side caching strategies to keep application state synchronized across multiple workflows.
- Refactored legacy implementations into reusable and maintainable frontend modules, improving code consistency and reducing duplicated logic.
- Collaborated with backend, design and product teams in **Scrum** environments to deliver new features and improve user experience.

**Spacelab Mx** — *Frontend Developer*

**Nov 2022 - Feb 2026** · *Remote*

- Developed a React-based web platform for monitoring autonomous drone operations, including mission management, flight status, telemetry, and operational workflows.
- Designed reusable UI components and documented them using **Storybook**, promoting consistency and maintainability across the application.
- Built interactive data-driven interfaces including dashboards, maps, tables, calendars, and operational status views.
- Collaborated with multidisciplinary teams throughout the planning, development, testing, and delivery of new product features.

## Showmac Entertainment — *Fullstack Developer*

Jun 2021 - Nov 2022 · Puebla, Mexico

- Developed responsive web and mobile applications using Angular and Flutter, integrating backend functionality with Firebase Realtime Database and Firestore.
- Managed application deployment and hosting across GitHub Pages, Firebase Hosting, and VPS environments.

## SELECTED PROJECTS

---

### Flight Management Software

React · TypeScript · Tailwind CSS · Storybook

- Designed frontend architecture for a web application managing autonomous drone operations.
- Built interactive real-time interfaces for telemetry, missions, maps, tables, calendars, and operational reports.

### Personal Portfolio & E-commerce

React · Next.js · Tailwind CSS · Three.js · WooCommerce

- Built a personal portfolio featuring interactive 3D experiences using Three.js and React Three Fiber.
- Developed and deployed an e-commerce solution using WordPress and WooCommerce.

## EDUCATION

---

### Benemérita Universidad Autónoma de Puebla

B.S. in Information Technologies Engineering

2016 - 2021 · Puebla, Mexico

## CERTIFICATION

---

**Three.js Journey** — Bruno Simon | 2025
